# Energy-Saving Tips for Summer

## Cooking

- Avoid the stove or the oven. Use toaster ovens, crockpots, microwaves when you are cooking small to medium-sized meals. They use less energy than your stove or oven.
- Use the smallest pans possible. It takes less energy to heat them.
- Use lids. They help the food cook more quickly by keeping the steam in.
- Turn off electric burners and ovens just before cooking is complete. The food will continue to cook.
- Keep preheating time to a minimum.
- Don't peek! You lose heat every time you open the door or lift the lid. Keep racks clear. Foil on oven shelves blocks heat and costs money.

## How Can Kids Help?

- Turn off the lights when you leave your room - and the bathroom.
- Turn off the radio, TV, computer, and games when you stop using them.
- Take shorter showers. They use about half as much water as a full bathtub.
- Check for problems Mom and Dad haven't noticed like dripping faucets - it takes energy to heat the water.
- Share rides with friends to after-school activities
- Close the fridge! Decide what you want from the refrigerator BEFORE opening the door - then close it quickly.
- Try a sweater if you're cold in the house? Don't turn up the thermostat.
